Diesel Engine

- Model:6ZTAA13-G2
- Construction: The enhanced cylinder block has low noise and little vibration. Longer stroke ensure gas burning more fully and increase effective power output with low fuel consumption.
- Advanced 4 - air valve construction: more power output, more air combustion, lower fuel consumption. Increase low speed torque has good performance high efficiency
- Fuel system: Rotator high pressure fuel pump, lower fuel consumption, and reduce noise effectively.
- Environment: The engine can work normally under the following conditions without de-rating:
 - A. 1800r/min engine--altitude less than 1500m (5000ft), ambient temperature less than 40 °C(104° F).
 - B. 1500r/min engine--altitude less than 1310m (4300ft), ambient temperature less than 40 °C(104° F)But engine working environment conditions exceed above, the engine output power will de-rate 4% as altitude increase each 300m(1000ft) at the altitude is higher than 1500m (5000ft), Also it will de-rate 2% as temperature increase every 11 °C(1% de-rating ,when temperature increase each 10° F). in the ambient temperature is higher than 40°C(104° F)
