Diesel Engine

- Model: QSZ13-G3
- Construction: Cummins high pressure common rail fuel system (HPCR) realizes multi-point injection, and the throttle responds quickly at different speeds. More efficient power output, better fuel economy and less noise
- The integrated oil-water pipeline replaces the traditional hose to eliminate the hidden trouble of leakage.
- Enhanced cooling and lubrication functions effectively extend the service life of the engine
- The two-stage dual fuel filter ensures balanced particulate dispersion and maximizes the life of the fuel filter life, protect the main components of the fuel system
- Emission standards: Comply to China Tier III emission standards
- Environment: The engine can work normally under the following conditions without de-rating:

A. 1800r/min engine--altitude less than 1500m (5000ft), ambient temperature less than 40 °C(104° F).

B. 1500r/min engine--altitude less than 1310m (4300ft), ambient temperature less than 40 °C(104° F)

But engine working environment conditions exceed above,

the engine output power will de-rate 4% as altitude increase each 300m(1000ft) at the altitude is higher than 1500m (5000ft),

Also it will de-rate 2% as temperature increase every 11 °C(1% de-rating ,when temperature increase each 10° F). in the ambient temperature is higher than 40°C(104° F)
