

# **POWERTEC Generator Set**

# Powered by Dongfeng Cummins QSZ13-G5 Engine

Model: PDC515B Prime Power: 370KW/465KVA

### **Genset Standard Configuration**

- Cummins Engine
  - Brushless synchronous alternator

Standby Power: 410KW/515KVA

- POWERTEC intelligent controller
- ◆ 40<sup>°</sup>C standard ambient temperature Water radiator
- ◆ Modularized case circuit breaker (3P)
- Float Battery Charger
- Battery connect wire
- Steel base frame(include shock absorbers)
- Silencer、bellows、exhaust bend
- Manual book and files

# **Genset Fundamental Characteristics**

- ◆ 230/400VAC, 50HZ 0.8PF 3 Phases, 4 wires output
- ♦ Frequency drop ≤3%
- ♦ Voltage modulation ≤0.3%
- The steady state frequency  $\leq 0.5\%$
- The steady state voltage deviation  $\leq \pm 1\%$
- The transient frequency deviation  $\leq$ +10%  $\leq$ -15%
- The transient voltage deviation  $\leq$ +20%  $\leq$ -15%
- ♦ Frequency recovery time ≤3S
- Voltage recovery time  $\leq 1S(Voltage \pm 3\%)$
- ♦ THF (Telephone Harmonic Factor) <3</p>
- TIF (Telephone Influence Factor) <50</li>
  Comply to Standard NEMA MG1-22.43
- Standard equipped with ambient temperature 40°C
  Connecting radiator
- Inbuilt shock absorber has high performance on shock absorption.
  It's easy to be transported and installed without embedding and
  Fixing rubber shock pad between the genset and ground

### **Genset Optional Configuration**

- 24V Starter Batteries
- Daily Fuel Tank
- Oil-water separator
- Warning function of low water level, low fuel oil
- Automatically monitoring & controlling system of city power
- Coolant heater
- Oil heater
- Heat exchanger--Water cooling Tower System
- Soundproof Canopy/ Trailer
- ISO container
- Design and construction of environmental protection
  Engineering for the Genset room

## **Performance Description of Diesel Engine**

- Model: Dongfeng Cummins QSZ13-G5
- Construction: Adopt forged steel camshaft and crankshaft, High strength Cylinder block design, plenty parts cast on the Cylinders, stiffness strong, high pressure resistant capacity is high, longer service life.
- Starting system: 24VDC starting motor
- Integrated design: Cylinders、 cylinder head together, decreased connection, reduced 40% parts than other same kind engine, failure rate bring down a lot.
- Advanced design and superior manufacture: Adapt to harsh severe work condition, high strength and has heavy loading work capacity.
- Fuel system: Rotator high pressure fuel pump, lower fuel consumption, and reduce noise effectively.
- Lubrication system: The cylinder sleeve designed by honing on the platform can effectively prevent oil leakage with perfect geometry.
- Engine Operating Environment Description:

The engine can work under the following conditions without modulating power:

- A. 1800r/min engine--altitude less than 1000m, ambient temperature less than 40  $\,\,^\circ\mathbb{C}$
- B. 1500r/min engine--altitude less than 1000m, ambient temperature less than 40  $\,^\circ C$

If engine operating environment exceed above condition, when altitude is higher than 1500m ,engine power will drop 4% as altitude increase each 300m. When ambient temperature is higher than  $40^{\circ}C(104^{\circ} \text{ F})$ , engine power will drop 3% -5% as temperature increase each  $11^{\circ}C(1\% \text{ droping})$ , when temperature increase each  $10^{\circ} \text{ F}$ . The engine allows continuous operation with a maximum altitude of 4,500m.

### **Performance Description Alternator**

- Optional Alternator: Stamford / Marathon/ Faraday/Engga/Mecc Alt
- Brushless, 4 pole rotating magnetic field, single bearing with protective cover.
- Insulation: H Class.
- Standard IP23 grade
- Cooling system
- AC exciter, rotate rectifying unit
- Surface of stator winding is covered with damp-proof epoxy Insulation varnish after impregnation proceeding
- Rotor and exciter is proceeded with high temperature insulating resin, will be more applicable for harsh environment.
- Rotor dynamic balancing comply to standard BS5625, class 2.5
- Sealed with advanced lubricating grease prolongs life of bearing.

Notes: Above data of alternator comes from Stamford. Proper specification is subject to the practice alternator if customers choose other alternator

# **Intelligent Control System**

### **Standard Detection Function**

- ◆ 3 phases voltage Ua,Ub,Uc
- Frequency F1
- Apparent power PR
- Coolant temperature WT
- Oil pressure OP
- Speed RPM
- ♦ HC timer 99999 hours records
- Maximum cumulative times of starting can reach 999999
- Standard Protection Function

#### **Genset Protection**

Programmable alarm and status input
 Emergency stop

#### **Engine Protection**

- Stop for over speed
- ◆ Alarm/Stop for low oil pressure
- Alarm/Stop for coolant high temperature
- Stop for failure to start/jigger
- Indication of sensor fault

#### **Alternator Protection**

- Stop for over high/low voltage
- Alarm/stop for over current
- Stop for loss of voltage detection signal

#### **Control System Components**

- Control switch—manual/auto/stop/start
- Screen menu selection button
- Setting button
- Fault status indicators

## **Communication Interface**

International standard MODBUS communication protocol with error detection as well as RS232/ RS485 (RS485 is opto-isolated type) has functions of remote control, telemetry and telesignalling, which are facilitate to monitor genset.

Notes: Above data of controller comes from POWERTEC GC6110. Proper specification is subject to customers' practice controller if other controller is selected.

- 3 phases current La,Lb,Lc
- Active power PA
- Power factor PF
- ♦ Temperature °C display
- KPa/Psi/Bar display
- Battery voltage V

### Alarm for low/high battery voltage

- Alarm for shortage of battery
- Stop for over frequency
- Stop for low frequency

Emergency stop button

(optional function)
