# **Performance Description of Diesel Engine**

- ♦ Model: Dongfeng Cummins QSZ13-G3
- Construction: Adopt forged steel camshaft and crankshaft, High strength Cylinder block design, plenty parts cast on the Cylinders, stiffness strong, high pressure resistant capacity is high, longer service life.
- ◆ Starting system: 24VDC starting motor
- ◆ Integrated design: Cylinders、cylinder head together, decreased connection,reduced 40% parts than other same kind engine, failure rate bring down a lot.
- ◆ Advanced design and superior manufacture: Adapt to harsh severe work condition, high strength and has heavy loading work capacity.
- ◆ Fuel system: Rotator high pressure fuel pump, lower fuel consumption, and reduce noise effectively.
- ◆ Lubrication system: The cylinder sleeve designed by honing on the platform can effectively prevent oil leakage with perfect geometry.
- ◆ Engine Operating Environment Description:

The engine can work under the following conditions without modulating power:

A. 1800r/min engine--altitude less than 1000m, ambient temperature less than 40 °C

B. 1500r/min engine--altitude less than 1000m, ambient temperature less than 40  $\,^{\circ}\mathrm{C}$ 

If engine operating environment exceed above condition, when altitude is higher than 1500m ,engine power will drop 4% as altitude increase each 300m. When ambient temperature is higher than  $40^{\circ}\text{C}(104^{\circ}\text{ F})$  ,engine power will drop 3% -5% as temperature increase each  $11^{\circ}\text{C}(1\% \text{ droping})$ , when temperature increase each  $10^{\circ}\text{F}$ ) The engine allows continuous operation with a maximum altitude of 4,500m.

# **Performance Description Alternator**
