Equipment Instruction

Performance Description of Diesel Engine

Model: Cummins QSNT-G4X

- Construction: Replaceable wet type cylinder block, well heat Dissipation, easy for change, high universality of parts, high Series, easy for maintenance, cylinder block and cylinder head Adopt in-built pressure lubricating oil, compact structure, Low failure rate
- Starting system: 24VDC starter
- Intake and exhaust: High efficiency Holset Waste Gas Supercharger improve burning, pressure type pulse exhaust Pipes take full use of exhaust energy and enhance engine Efficiency .Air to air cooling technology realize economic Fuel consumption and improve emission.
 - Fuel consumption and improve emission.
 Cooling system: Gear centrifugal water pump forces water cooling
 And large flow channel has good cooling performance
 Rotary water filter and special DCA additive able to prevent corrosion cavitation and control PH value of the coolant remove impurity.
- Fuel system: Cummins patented technology EFI fuel injection system optimizes combustion and upsurge power.
 STC distribution system ensures working combustion more completely. Low pressure oil supply system and fuel one way circuit provide safety and reliability.
- Lubrication system: All moving parts are forced lubrication. Large capacity integral gear driven pump provides pressure lubrication to all bearings and provides supply for piston cooling. Oil cooler and compound filters keep lubrication in good position.
- Engine Operating Environment Description:

The engine can work under the following conditions without modulating power: 1500r/min engine--altitude less than1000m (3280ft), ambient temperature less than 40 $^{\circ}$ C (104 $^{\circ}$ F) If engine operating environment exceed above condition, when altitude is higher than 1000m,engine power will drop 4% as altitude increase each 300m(1000ft).When ambient temperature is higher than 40 $^{\circ}$ C(104 $^{\circ}$ F) ,engine power will drop 2% as temperature increase each 11 $^{\circ}$ C(1% droping ,when temperature increase each 10 $^{\circ}$ F)

Performance Description Alternator

- Optional Alternator: Stamford / Marathon/ Faraday/Engga/Mecc Alt
- Brushless, 4 pole rotating magnetic field, single bearing with protective cover.
- Insulation: H Class.
- Standard IP23 grade
- Cooling system
- AC exciter, rotate rectifying unit
- Surface of stator winding is covered with damp-proof epoxy Insulation varnish after impregnation proceeding
- Rotor and exciter is proceeded with high temperature insulating resin, will be more applicable for harsh environment.
- Rotor dynamic balancing comply to standard BS5625, class 2.5
- Sealed with advanced lubricating grease prolongs life of bearing.

Notes: Above data of alternator comes from Stamford. Proper specification is subject to the practice alternator if customers choose other alternator
