

# **Perkins**

## **POWERTEC Generator Set**

### Powered by Perkins 4006-23TAG3A Engine

Model: PPE900 Prime Power: 640KW/800KVA Standby Power: 720KW/900KVA

### **Genset Fundamental Characteristics**

- 230/400VAC, 50HZ 0.8PF 3 Phases, 4 wires output
- ♦ Frequency drop ≤3%
- ♦ Voltage modulation ≤0.3%
- The steady state frequency  $\leq 0.5\%$
- The steady state voltage deviation  $\leq \pm 1\%$
- The transient frequency deviation  $\leq$ +10%  $\leq$ -15%
- The transient voltage deviation  $\leq$ +20%  $\leq$ -15%
- ♦ Frequency recovery time ≤3S
- Voltage recovery time  $\leq 1S(Voltage \pm 3\%)$
- THF (Telephone Harmonic Factor) <3</li>
- TIF (Telephone Influence Factor) <50</li>
  Comply to Standard NEMA MG1-22.43
- Standard equipped with ambient temperature 40°C
  Connecting radiator
- Inbuilt shock absorber has high performance on shock absorption.
  It's easy to be transported and installed without embedding and
  Fixing rubber shock pad between the genset and ground

### **Genset Optional Configuration**

- 24V Starter Batteries
- Daily Fuel Tank
- Oil-water separator
- Warning function of low water level, low fuel oil
- Automatically monitoring & controlling system of city power
- Coolant heater
- Oil heater
- Heat exchanger--Water cooling Tower System
- Soundproof Canopy/ Trailer
- ISO container
- Design and construction of environmental protection Engineering for the Genset room

### **Genset Standard Configuration**

- Perkins Engine
- Brushless synchronous alternator
- POWERTEC intelligent controller
- ◆ 40<sup>°</sup>C standard ambient temperature
  Water radiator
- Modularized case circuit breaker (3P)
- Float Battery Charger
- Battery connect wire
- Steel base frame(include shock absorbers)
- Bellows、exhaust bend
- Manual book and files

# **Equipment Instruction**

2

# **Performance Description of Diesel Engine**

### Model: Perkins 4006-23TAG3A

- Construction: Equiping with independent four valves cylinder head to facilitate air flow. The single fuel injector ensures ultra atomization of diesel fuel and combust at high speed under full control. Sharing a large number of components with other 4000 series engines helps to reduce the inventory of the manufacture.
- Intake: Turbocharged
- Fuel system: Digital governor with isochronous function, speed is Adjustable to ISO8528-5 standard; direct injection system with lift pump
- Lubrication system: Wet all aluminum oil pan with oil injector and oil dip stick
- Cooling system: Double thermostat, water pump; radiator equipped with built-in air for air pressurized intercooler (independent supply)
- Filtration system: Embedded air filter and turbocharger; rotary full-flow fuel filter; rotary full-flow oil filter
- Electrical equipment: 24V starter and 24V alternator, built-in regulator (DC output); turbine inlet high temperature protection switch; coolant high temperature protection switch; low oil pressure protection switch
- ◆ Lower operating cost: The standard replacement oil interval is set to 500 hours
- Engine Operating Environment Description:

The engine can work under the following conditions without modulating power: 1800r/min engine--altitude less than 1000 m, ambient temperature less than 40  $\,^\circ C$  1500r/min engine--altitude less than1000 m, ambient temperature less than 40  $\,^\circ C$ 

## **Performance Description Alternator**

- Optional Alternator: Stamford / Marathon/ Faraday/Engga/Mecc Alt
- Brushless, 4 pole rotating magnetic field, single bearing with protective cove
- Insulation: H Class.
- Standard IP23 grade
- Cooling system
- AC exciter, rotate rectifying unit
- Surface of stator winding is covered with damp-proof epoxy Insulation varnish after impregnation proceeding
- Rotor and exciter is proceeded with high temperature insulating resin, Will be more applicable for harsh environment.
- Rotor dynamic balancing comply to standard BS5625, class 2.5
- Sealed with advanced lubricating grease prolongs life of bearing.

# Notes: Above data of alternator comes from Stamford. Proper specification is subject to the practice alternator if customers choose other alternator

# Intelligent Control System

### **Standard Detection Function**

- 3 phases voltage Ua,Ub,Uc
- Frequency F1
- Apparent power PR
- Coolant temperature WT
- Oil pressure OP
- Speed RPM
- HC timer 99999 hours records
- Maximum cumulative times of starting can reach 999999
  - **Standard Protection Function**

#### **Genset Protection**

Programmable alarm and status input
 Emergency stop

#### **Engine Protection**

- Stop for over speed
- Alarm/Stop for low oil pressure
  - Alarm for shortage of battery
- Alarm/Stop for coolant high temperature
- Stop for failure to start/jigger
- Indication of sensor fault

### **Alternator Protection**

- Stop for over high/low voltage
- Alarm/stop for over current
- Stop for loss of voltage detection signal

### **Control System Components**

- Control switch—manual/auto/stop/start
- Screen menu selection button
- Setting button
- Fault status indicators

## **Communication Interface**

(optional function)

Emergency stop button

Digital display

Stop for over frequency

Stop for low frequency

International standard MODBUS communication protocol with error detection as well as RS232/ RS485 (RS485 is opto-isolated type) has functions of remote control, telemetry and telesignalling, which are facilitate to monitor genset.

Notes: Above data of controller comes from POWERTEC GC6110. Proper specification is subject to customers' practice controller if other controller is selected.

- 3 phases current La,Lb,Lc
- Active power PA
- Power factor PF
- Temperature °C display

Alarm for low/high battery voltage

- KPa/Psi/Bar display
- Battery voltage V

	Model	PPE900
